

Report On Car Rental Services

Introduction:

An Online Car rental System allows a person to book/reserve a vehicle with/without payment on one end ~~why~~ while the company staff handles the transactions; on the other via the Internet. Online Car rental Systems are used mostly in developed countries where electronic Commerce has been fully accepted in the society. Famous Companies has gained popularity since the business used the technology available to expand and provide more facilities to their customers.

The basic functions of an online rental system are to keep tracks of vehicles, staff, customers and booking. It provides useful information to the staff such as giving daily Reports of vehicles to be delivered / picked up and acts as a vehicle management System by monitoring the use and price, of the vehicles.

About login page:-

features:-

- * Name
- * Email
- * password
- * Mobile Number
- * Gender
- * Address

In Car Rental System login page is more important and in this project it was developed through Html and css. In this we will see two types of Signin options. If the user is new or not yet registered. It will show you to fill the personal details like Name, Email, ~~pas~~ create password and conform it and your Gender and mobile number with address. If the ~~Q~~ user is already registered he ~~ca~~ or she can directly login by typing his or her email or mobile number with the password and press Submit.

②. About quality of car:

Good car have Qualities like

- ① Safety
- ② Affordable
- ③ Maintenance
- ④ Comfortable
- ⑤ Performance
- ⑥ Reliable
- ⑦ Attractive

But all these characteristics cant' be seen in one car

It depends on the amount of money you spend to purchase the car

1) Safety:

It is the most important one to consider while buying a car with Air bags is a must, at least two, One for driver and one for co-driver

and cars with good braking system like Antilock Braking System (ABS) it prevents the wheels from locking up during braking.

2) Maintenance:

Maintaining a car generally include changing of oil, Oil filters, tyres and also other fluids in car like break fluid, Coolant fluid. powersteering fluid, Ac coolant etc

cars with minimum maintenance cost can be considered

However maintaining diesel cars are more costly compared to petrol engines.

3) Performance :-

performance of a vehicle depends on its power, torque and milage. It defines how fast your car can move. The Suspension system for rough terrain and typical rash road and also the breaking system. Fuel economy being the important one.

4) Reliable :-

Reliability can be defined as cars which require only normal repairs for say 10-15 years. However it depends on how well you take care the car and the condition under which it has been driven.

characteristics apart from these will surely reflect in the user reviews. Also i suggest you not to buy the basic versions of any model.

③ About payment:

Features or Index:

- 1) Debit or Credit Card number
- 2) Expiry date
- 3) CVV
- 4) OTP
- 5) UPI payment
- 6) UPI mobile number

The payment mode is important in Car Rental software. In this we will give our payment details like our debit or credit Card number with its expiry date and we will give the CVV of that Card. After that if we press enter we will get an OTP for the number which is registered with that bank account. After receiving that OTP we need to type that. We can also pay money through the UPI transactions also by giving those details also we can pay.

④ About destination point :-

After all these process is done the final thing is to Reach the Car upto the user Address. As we give the total address to the Rental Service the Car ~~is~~ will reach to the user by the delivery boy through the comfort way with out damaging to it.

In this way the Car rental system works and makes the user or purchaser happy.
